Cala Forte Rosé 2023

Toscana IGT

Cala Forte Rosé is an expression of a lively and fresh Mediterranean spirit. Its soft rosé hues accompanied by a maritime bouquet, its delicate persistence along with its versatility, make it the ideal companion for appetizers, or tasty fish dishes.

Climatic trend

The early 2023 vintage was characterized by below-average temperatures and heavy rainfall. Rising temperatures in July brought vintage averages back in line with historical averages. From August until the beginning of autumn (the season until which grape ripening was prolonged) temperatures significantly exceeded historical averages. This, as well as the absence of precipitation, strong solar radiation and warm southerly winds that blew over Tuscany reversed the trend from spring 2023. The absence of rainfall and refreshing sea breezes characterized the harvest, allowing for healthy grapes and harvesting them at the best time.

Technical notes

Wine Variety: Sangiovese and Syrah

Alcohol content: 12%

Maturation: in steel

Tasting notes

CalaForte rosé presents a soft pink color. The nose hints at small red berries, citrus sensations but also Mediterranean herbs. The palate is delicate but characterized by a rather evident savory note, typical of the production area.

Wine pairing: It pairs perfectly with raw fish, shellfish and seafood, first and second courses. It does not disdain vegetable crudités and also an accompaniment with fresh, soft cheeses.
